

Control your business mileage with **Journeys**.

The mileage management solution that's exclusively reserved for customers of Arnold Clark Vehicle Management.

By tracking your business miles and giving you essential data on your fleet, Journeys can help reduce transport costs and lower environmental impact. The app is available for Android or iOS mobile devices and Journeys can also be accessed via your desktop through the AutoCentre web portal.

What does Journeys do?

- Records accurate distances as you drive, using GPS.
- Showcases your chosen route on interactive maps.
- Records journeys in any vehicle, including pool cars, grey fleet, courtesy cars and temporary rental vehicles.
- Helps you control and monitor business journeys.
- Can be used in conjunction with fuel cards and emissions reporting.

How it works

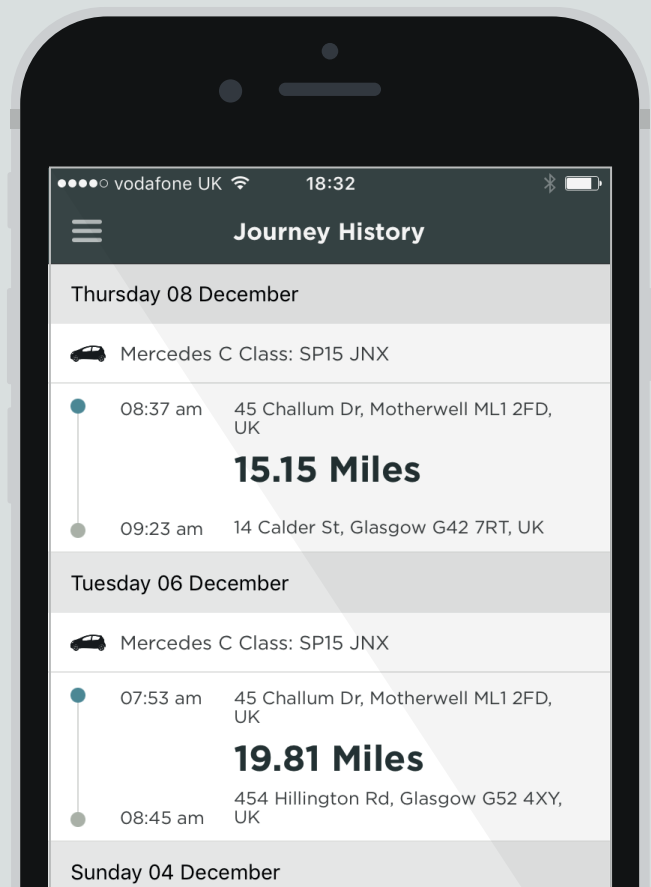

Need to record a journey? It's simple.

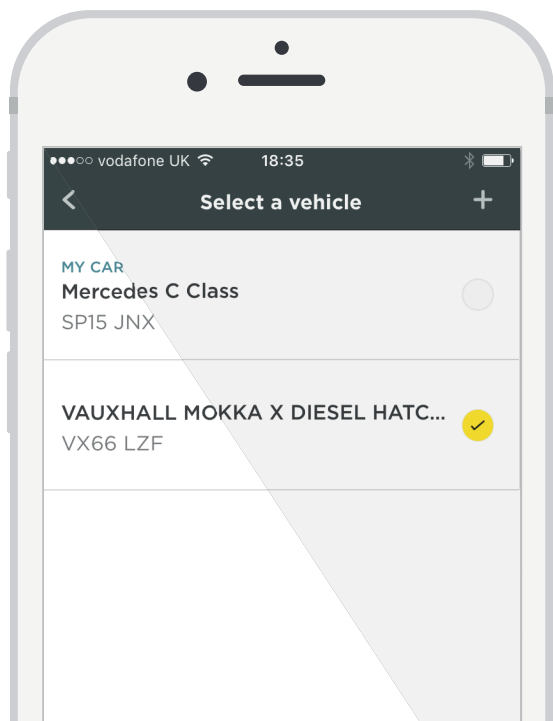

- After downloading the free app, drivers can sign in using their AutoCentre account details.
- Journeys will recognise the driver's normal vehicle, so all you have to do is tell the app when you're starting a journey, and when it's complete.
- The system records the date, the duration and the reason for each business journey.
- Each month the driver declares an odometer reading.
- If a driver needs to review or log any trips they've forgotten to record, they can do this via AutoCentre.
- Any trip not logged into the app will then be treated as a private journey.

Fleet Manager tools

Journeys provides detailed information on every business trip logged by drivers, so you can:

- Review business journeys via Cost Centre, Driver, Date or Vehicle.
- Examine the reason for trips and the time they've taken.
- Open previous months if a driver has any journeys outstanding.
- Export journey logs or simply review journeys for a comprehensive picture of your fleet's total business mileage.

Why choose Journeys?

- Easy to use
- Easy to access — compatible on Android and iOS mobile devices
- Designed with drivers in mind
- Reduces transport costs
- Lowers your vehicle emissions and improves efficiency
- Complies with HMRC requirements
- Records journeys in any vehicle
- Prevents false mileage claims
- No installation costs or need to upload data
- No data privacy issues

By helping you take control of your business mileage, Journeys can give you the data you need to reduce costs for company owned vehicles.

Avoid false mileage claims

A recent report suggests up to one third of drivers submit false expenses with many claiming for extra mileage. By using Journeys, you can ensure mileage recorded is accurate, so you can save money on false claims.

Make the fleet more productive

It takes employees between one and two hours to complete their expense claims every month. If they were using Journeys, employees would no longer have to spend time recalling their journeys and instead could focus on improving productivity.

Make it easier to carry out a mileage audit

With HMRC taking a tougher stance on mileage audits, it's important to make sure that you comply with the law and avoid penalties for inaccurate recording.

To do this, you must have a robust system in place. It's not enough to simply record mileages; you also need to audit these to make sure that claims are accurate. Journeys makes it easy to carry out spot checks and analyse your mileage.
